Summary

iOS developer with 5+ years of experience in crafting, scaling, and deploying complex iOS applications across multiple domains. I have consistently delivered innovative and user-centric solutions that enhance engagement and improve overall user experience. Known for detailed planning, problem-solving abilities, and delivering high-quality code.

Experience

Freelance | Senior iOS Developer

SEP 2024 - PRESENT | BERLIN, GERMANY

- Developed an intranet application featuring articles, events, job listings, and user profiles, enhancing internal communication and engagement.
- Currently working on an AI-driven health and wellness app, focusing on personalized meal plans, workouts, and supplement recommendations.

Getir Germany GmbH | iOS Engineer

APR 2022 - NOV 2023 | BERLIN, GERMANY

- Responsible for the Getir Bitaxi domain within the Turkish market.
- Developed and integrated a driver-rider messaging feature, resulting in a 10% reduction in call costs.
- Led the pre-tip feature implementation, increasing driver acceptance rate by 70%.
- Implemented push notifications to keep users informed about ride status, significantly enhancing user engagement and real-time communication.
- Introduced a campaigns and announcements tab, increasing user awareness of ongoing promotions and important updates.
- Optimized the cancellation flow, reducing cancellation rates and improving user satisfaction by providing a smoother experience.
- Implemented unit testing and code reviews, ensuring high coding standards and best practices.

Monstarlab EMEA | iOS Developer

MAY 2019 - MAY 2021 | BERLIN, GERMANY

- Developed and maintained iOS applications using Swift and worked on Flutter-based projects, collaborating with a multi-platform team in an Agile environment.
- Implemented dark mode support by integrating it with the existing design system, ensuring design consistency.
- Transitioned from imperative AutoLayout code to a declarative approach, enhancing code readability, maintainability, and overall efficiency.
- Managed CI pipelines with Bitrise and led app deployments using Fastlane, streamlining the development process.

IndiaNIC Infotech Ltd | Software Engineer iOS

FEB 2016 - OCT 2017 | AHMEDABAD, INDIA

- Contributed to various iOS app development projects, enhancing app performance and user satisfaction.
- Designed and implemented application features based on detailed requirements, improving functionality and user experience.
- Executed thorough testing and bug fixing, and managed app deployments to the App Store.
